Investment Objective & Strategy

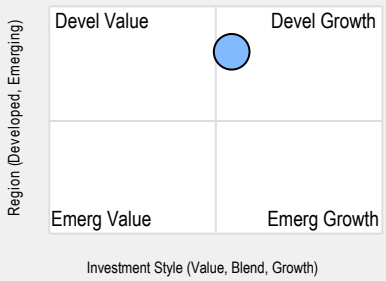

The investment objective of the Fund is to provide long-term total return, which includes capital appreciation and income.

The Fund invests principally in equity securities (such as common stock) issued by non-U.S. companies of any capitalization, located in the world 's developed and emerging capital markets. The Fund employs a "core equity" investment strategy that seeks to meet the Fund's investment objective by investing in both growth- and value-oriented equity securities. Under normal circumstances, the Fund will invest at least 80% of its net assets (plus borrowings for investment purposes, if any) in the equity securities of non-U.S. companies. For purposes of the 80% test, equity securities include securities such as common stock, preferred stock, and other securities that are not debt securities, cash or cash equivalents.

Marsh Investments US LLC (the "Advisor") has contractually agreed, until at least July 31, 2027, to waive any portion of its management fee that exceeds the aggregate amount of the subadvisory fees that the Advisor is required to pay to the Fund's subadvisors. Performance would have been lower without these waivers in effect.

Net Expense Ratio as of 3/31/2026 per the latest Annual Financial Statements. Net Expense Ratio includes the impact of fee waivers and excludes certain indirect expenses of underlying investments.

A 2.00% redemption fee applies to shares owned less than 30 days.

Class Y-3 shares generally are available only to "Institutional Investors" which include, but are not limited to "Institutional Accounts" as defined under the rules of the Financial Industry Regulatory Authority, Inc. ("FINRA").

Investors should carefully consider the fund's investment objectives, risks, charges and expenses before investing. To obtain a prospectus that contains this and other information, please visit: https://www.mercer.us/what-we-do/wealth-and-investments/delegated-solutions-us.html or call 1-800-346-2510. Please carefully read the prospectus, and if available, summary prospectus, before investing.

Allocation of Fund Assets

The Advisor, on behalf of the Fund, has entered into subadvisory agreements with subadvisors to manage allocated portions of the assets of the Fund. Under the subadvisory agreements, each subadvisor is responsible for the day-to-day portfolio management of a distinct portion of the Fund's portfolio, subject to the Advisor's oversight. The Fund's subadvisors are:

Manager	Factor Presence	Summary
Arrowstreet Capital, L.P.	Multi-factor Small size	Quantitative process based on fundamental and technical signals utilizing adaptable models to changing market environments; typically has momentum, small cap and value bias; however, biggest bets are done in the areas with highest forecasted payoff in a risk-controlled fashion.
LSV Asset Management	Value Small size	Deep value style focuses on seeking securities which management and the PM team believes are inexpensive relative to the market based on market multiples such as P/E, P/CF, and P/B.
Massachusetts Financial Services Company	Quality	Applies disciplined approach to selection of stocks where the team believes long-term value is not adequately reflected in the price.
Hardman Johnston	Growth Quality	Fundamental, concentrated portfolio seeking accelerating growth in earnings and revenues that are sustainable over time.
WCM	Growth Small Size Quality	Fundamental, concentrated portfolio focused on firm stability and future growth potential through market share dominance.
Parametric Portfolio Associates LLC	Cash Overlay	Cash equitization strategy.

Allocations are as of the date listed and are subject to change.The managers identified do not represent all of the managers selected or recommended for all clients. It should not be assumed that allocation to the managers identified was or will be profitable.

MARSH

Mercer Non-US Core Equity Fund

as of September 30, 2026

Risk Factors

The Fund invests in both growth stocks and value stocks. Growth stocks may be particularly sensitive to market conditions. Investing in value stocks involves the risk that an investment made in undervalued securities may not appreciate in value as anticipated or remain undervalued for long periods of time. The Fund invests in foreign and emerging market securities which involves certain risks such as currency fluctuations, political and social instability and reduced market liquidity. Investing in emerging markets are subject to special risks that are not normally associated with more developed foreign markets. Investments made in small and mid-capitalization companies may be more volatile and less liquid due to limited resources or product lines and more sensitive to economic factors. The Fund may invest in derivatives (such as futures, forwards, options or swaps), which may cause the Fund to experience greater volatility and less liquidity. Derivatives may be more sensitive to changes in market conditions and may amplify the risk of loss for the Fund. The Fund may experience high portfolio turnover which could result in higher transaction costs and capital gains. There are no guarantees that dividend-paying stocks will continue to pay dividends. There can be no assurance that any fund will achieve its objective.

Key Terms

The Fund changed its regulatory benchmark to the MSCI World ex USA IMI Index effective February 28, 2025. Prior to that date it was the MSCI EAFE Index.

The MSCI World ex USA Investable Market Index (IMI) captures large, mid and small cap representation across Developed Markets (DM) countries--excluding the United States. The index covers approximately 99% of the free float-adjusted market capitalization in each country.

The MSCI EAFE (Net)® captures large and mid-cap representation across Developed Markets countries around the world, excluding the US and Canada. The index covers approximately 85% of the free float-adjusted market capitalization in each country.. One cannot invest directly in an index.

Alpha - Reflects how a Fund did relative to what would be expected given the Fund's beta and the performance of its benchmark. For example, alpha of 1.4 means the Fund outperformed its estimated return by 1.4%.

Beta - The Fund's sensitivity to market changes using its benchmark as an approximation of the market, beta greater than 1 is more volatile, beta less than 1 is less volatile.

Up Market Capture - Ratio of average portfolio return over the benchmark during periods of positive benchmark return. Higher values indicate better product performance.

Down Market Capture - Ratio of average portfolio return over the benchmark during periods of negative benchmark return. Lower values indicate better product performance.

Standard deviation - Typically referred to as Volatility or Risk, standard deviation measures the dispersion of actual returns around their average.

Sharpe ratio - Reflects the reward per each unit of risk taken by a portfolio. The higher the ratio, the better the Fund's risk-adjusted return.

Tracking Error - A measure of active risk relative to the benchmark. Reflects the standard deviation of the difference between the portfolio return and benchmark return.

Information Ratio - A measure of manager skill relative to the benchmark. Reflects the difference between the portfolio return and benchmark return, adjusted for the level of risk (tracking error).

Turnover - Depending on market and other conditions, the Fund may experience high portfolio turnover, which may result in higher brokerage commissions and transaction costs and capital gains

Price/Earnings - A financial ratio calculated as current share price divided by current earnings per share. Earnings per share is the portion of a company's profit allocated to each outstanding share.

Price/Book - A financial ratio calculated as current share price divided by book value per share. It compares how the market values a company to the value on the company's books.

Market Capitalization - The product of the market price and the total amount of a security outstanding. This represents the total market value of the security in the hands of its investors.

Average Market Cap - The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. This is calculated by taking the geometric mean of the market capitalizations of the stocks a fund owns.

Index Provisions

The indices listed are not managed and one cannot invest directly in an index.
