Section 1

Introduction

Artificial intelligence (AI) has become more of a permanent feature of the workplace for many employees and employers around the world and poses many challenges and considerations as it reshapes work.

To help employers consider the issues associated with AI, this roundup provides links to general information about ongoing legislative and governance initiatives and trends. Sources include Marsh, organizations, government websites, third-party resources, and news articles. The aggregated content in each section is organized in reverse chronological order and is by no means comprehensive.
